PARIS, February 17th, 1937.

MONSIEUR LE MINISTRE,

I have the honour to confirm the results of the recent conversations between our two Governments for the purpose of facilitating trade between France and Sweden as far as possible, which have led to the framing of the following Arrangement:

(a) Of the aggregate quotas at present established or which may hereafter be established, Sweden shall receive a share calculated according to the ratio between the imports of Swedish products and the total imports of the same products during the basic period. This calculation shall be made according to the same methods as are followed in regard to any other country.

(b) The French Government reserves the right to negotiate either with Sweden or with any other country concerning the remainder of the aggregate quota, once there has been allotted to Sweden the share guaranteed to her by the preceding paragraph.

(c) As regards the administration of the quotas Sweden shall be granted, on her Government so requesting and under the same conditions and subject to the same reservations concerning the same product, the most favourable treatment accorded to any third country.

(d) Should the French Customs statistics show that a quota granted to Sweden has been drawn upon to its full amount, the French authorities, before suspending imports of the product concerned, shall notify the Swedish Legation in Paris. The notice informing importers that the quota has been drawn upon to its full amount shall be published not sooner than ten days after this notification, this interval being such as to enable the Swedish authorities to present, should they so desire, any statistical particulars in view of which the decision might be modified. Should it be recognised that the quota has in fact been drawn upon to its full amount, all amounts imported in excess shall be entered under the quota of the following period.

(e) The French Government will give the most favourable consideration to the possibility of carrying forward from one quarter to the next the unutilised portion of the

quotas granted to Sweden. It will be for the Swedish Legation in Paris, at the end of each quarter, to state the quantities it desires to have carried forward, the French Administration retaining the right, however, to examine the figures produced.

(f) The French Government will also give favourable consideration to requests for an authorisation, in particular cases, to utilise in advance, during a given quarter, a portion of the quotas granted in respect of the following quarter.

(g) Any special cases arising from divergent technical interpretations, to which attention is drawn by the Swedish Legation in Paris, shall receive the most favourable consideration.

(h) Any requests presented by the above-mentioned Legation regarding the possible allotting of additional quotas, account being taken of the circumstances of each particular case and of the conditions obtaining on the French market, shall be most favourably examined.

The advantages specified above shall be granted to Sweden on condition that the Royal Government consents to the following reductions in Customs duties in respect of the French goods listed below:
