B

The General Assembly,

Recalling its resolutions 582 (VI) of 21 December 1951, 665 (VII) of 5 December 1952, 1927 (XVIII) of 11 December 1963, 2118 (XX) of 21 December 1965, 2961 C (XXVII) of 13 December 1972 and 31/95 A and B of 14 December 1976,

Noting a significant increase in the assessment of some Member States in the proposed scale for the period 1980-1982 in relation to the previous scale,

Bearing in mind the continuing disparity between the economies of developed and developing countries,

1. Reaffirms that the capacity of Member States to contribute towards the payment of the budgetary expenses of the United Nations is the fundamental criterion on which scales of assessment are based;

2. Requests the Committee on Contributions to study in depth and report to the General Assembly at its thirty-fifth session on ways and means of increasing the fairness and equity of the scale of assessments, bearing in mind the debate under agenda item 103 in the Fifth Committee during the thirty-fourth session of the Assembly,¹¹ and, in particular:

(a) Methods which would avoid excessive variations of individual rates of assessment between two successive scales, including ways of setting a percentage limit or percentage points limit or a combination of the two;

(b) Ways of taking into account conditions or circumstances which adversely affect the capacity to pay of Member States and ways of setting objective criteria by which these conditions or circumstances can be taken into account in the elaboration of the scale of assessments;

(c) Ways of taking into account the particular situation of Member States whose earnings depend heavily on one or a few products;

(d) Ways of bringing up to date the values of the *per capita* allowance formula and their effects on the scale of assessments;

(e) Ways of taking into account the different methods of national accounting of Member States, including the level of different inflation rates and their effects on the comparability of national income statistics;

(f) Ways of taking into account the concept of accumulated wealth and the ways by which criteria could be developed to enable it to be applied as a factor in setting the scale of assessments;

(g) Methods to ensure that all countries are assessed on data covering the same period of time so that data used are comparable;

(h) Effects of altering the statistical base period in the scale of assessments.
