64/109. The role of diamonds in fuelling conflict: breaking the link between the illicit transaction of rough diamonds and armed conflict as a contribution to prevention and settlement of conflicts

The General Assembly,

Recognizing that the trade in conflict diamonds continues to be a matter of serious international concern, which can be directly linked to the fuelling of armed conflict, the activities of rebel movements aimed at undermining or overthrowing legitimate Governments and the illicit traffic in and proliferation of armaments, especially small arms and light weapons,

Recognizing also the devastating impact of conflicts fuelled by the trade in conflict diamonds on the peace, safety and security of people in affected countries, and the systematic and gross human rights violations that have been perpetrated in such conflicts,

Noting the negative impact of such conflicts on regional stability and the obligations placed upon States by the Charter of the United Nations regarding the maintenance of international peace and security,

Recognizing that continued action to curb the trade in conflict diamonds is imperative,

Noting with appreciation that the Kimberley Process, as an international initiative of the Governments of participant States, has pursued its deliberations on an inclusive basis involving concerned stakeholders, including producing, exporting and importing States, the diamond industry and civil society, as well as applicant States and international organizations,

Recalling that the elimination of conflict diamonds from legitimate trade is the primary objective of the Kimberley Process,

Calling for the consistent implementation of commitments made by Kimberley Process participant States,

Acknowledging that the diamond sector is an important catalyst for achieving poverty reduction and meeting the requirements of the Millennium Development Goals in many producing countries, particularly in developing countries,

Bearing in mind the positive benefits of the legitimate diamond trade to producing countries, and underlining the need for continued international action to prevent the problem of conflict diamonds from negatively affecting the trade in legitimate diamonds, which makes a critical contribution to the economies of many of the producing, exporting and importing States, especially developing States,

Noting that the vast majority of rough diamonds produced in the world are from legitimate sources,

Recalling the Charter and all the relevant resolutions of the Security Council related to conflict diamonds, and determined to contribute to and support the implementation of the measures provided for in those resolutions,

Recalling also Security Council resolution 1459 (2003) of 28 January 2003, in which the Council strongly supported the Kimberley Process Certification Scheme¹ as a valuable contribution against trafficking in conflict diamonds,

Welcoming the important contribution of the Kimberley Process, which was initiated by African diamond-producing countries,

Noting with satisfaction that the implementation of the Kimberley Process Certification Scheme continues to have a positive impact in reducing the opportunity for conflict diamonds to play a role in fuelling armed conflict and would help to protect legitimate trade and ensure the effective implementation of the relevant resolutions on trade in conflict diamonds,

Acknowledging that lessons learned from the Kimberley Process are useful for the work of the Peacebuilding Commission in its consideration of the countries included in its agenda, as appropriate,

Recalling its resolutions 55/56 of 1 December 2000, 56/263 of 13 March 2002, 57/302 of 15 April 2003, 58/290 of 14 April 2004, 59/144 of 15 December 2004, 60/182 of 20 December 2005, 61/28 of 4 December 2006, 62/11 of 26 November 2007 and 63/134 of 11 December 2008, in which it called for the development and implementation as well as a periodic review of proposals for a simple, effective and pragmatic international certification scheme for rough diamonds,

Welcoming, in this regard, the implementation of the Kimberley Process Certification Scheme in such a way as not to impede the legitimate trade in diamonds or impose an undue burden on Governments or industry, particularly smaller producers, nor hinder the development of the diamond industry,

Welcoming also the decision of forty-nine Kimberley Process Participants, representing seventy-five countries, including the twenty-seven members of the European Union represented by the European Commission, to address the problem of conflict diamonds by participating in the Process and implementing the Kimberley Process Certification Scheme,

Noting the consensual outcomes of the plenary meeting of the Kimberley Process, held in Swakopmund, Namibia, from 2 to 5 November 2009,

¹ See A/57/489.

Welcoming the important contribution in fulfilling the purposes of the Kimberley Process that has been made and continues to be made by civil society and the diamond industry, in particular the World Diamond Council which represents all aspects of the diamond industry, to assist international efforts to stop the trade in conflict diamonds,

Welcoming also the voluntary self-regulation initiatives for the diamond industry announced by the World Diamond Council, and recognizing that a system of such voluntary self-regulation contributes, as described in the Interlaken Declaration of 5 November 2002 on the Kimberley Process Certification Scheme for Rough Diamonds,² to ensuring the effectiveness of national systems of internal control for rough diamonds,

Recognizing that State sovereignty should be fully respected and that the principles of equality, mutual benefits and consensus should be adhered to,

Recognizing also that the Kimberley Process Certification Scheme, which came into effect on 1 January 2003, will be credible only if all Participants have requisite national legislation coupled with effective and credible internal systems of control designed to eliminate the presence of conflict diamonds in the chain of producing, exporting and importing rough diamonds within their own territories, while taking into account that differences in production methods and trading practices, as well as differences in institutional controls thereof, may require different approaches to meeting minimum standards,
