FINAL PROTOCOL.

On signing this day the Additional Agreement to the Commercial Convention concluded on February 8th, 1922, at Budapest between the Republic of Austria and the Kingdom of Hungary, the undersigned Plenipotentiaries have agreed on the following provisions :

1. In order to encourage as far as possible, in the interests of both States, the mutual trade in goods and to bring it to a level corresponding more closely to the economic requirements of both States, the two Governments agree to make all possible use of the means at their disposal to arrive at this level. To this end, the Royal Hungarian Government declares its readiness to regulate on its own initiative the trade in goods between Austria and Hungary with a view to reducing the balance, which has hitherto been adverse to Austria, in such a manner that, should the value of Hungarian exports to Austria, according to the returns for the last two-monthly observation period, exceed Austrian exports to Hungary by more than 50 per cent, the said excess shall be reduced to 50 per cent. The Austrian Federal Government shall take similar action if Hungarian exports to Austria, according to the returns for the last two-monthly observation period, exceed Austrian exports to Hungary by less than 50 per cent. In this connection, the Austrian and Hungarian Governments agree that the said level of trade shall be achieved by an expansion and not, if possible, by a restriction of trade transactions between the two countries. In order to give practical effect to the above principles, a Mixed Commission shall be set up, consisting of representatives of the central authorities of both countries, which shall keep the trade between the two countries under constant and direct observation and shall propose such measures as are calculated to influence trade in the direction agreed upon. This Committee shall, in particular, meet every fifteenth day after the expiry of each two-monthly period of the validity of the Treaty, to determine the results of the balance of trade by comparing the data which the two Commercial Statistics Departments must submit for the previous

two months. In this connection, due account shall be taken of seasonal fluctuations and of economic occurrences which have a substantial effect on the development of trade.

2. Should the Commission be unable within one month to agree on the measures to be proposed, either Contracting Party shall be entitled to give two months' notice denouncing the present Treaty. Such notice, however, shall not take effect if during the period of notice the statistics prove that the measures taken by the State to which notice has been given have restored the desired level.

3. It is understood that a change in the ratio 1 : 1.5 which does not exceed the limits of 1 : 1.4 and 1 : 1.6 shall not constitute justification for denunciation.

I. HUNGARIAN AND AUSTRIAN CUSTOMS TARIFFS.

Notices, posters and brochures recommending the public to visit Austrian tourist resorts or watering-places, or which aim generally at encouraging foreigners to travel in Austria, shall be admitted into Hungary free of duty, irrespective of the space occupied by the advertising matter.

Ad No. 87 of the Austrian Customs and No. 131 of the Hungarian Customs Tariffs.

In the wine trade, geographical appellations based on the name of a locality situated in the territory of the Contracting Parties may, when such appellations are protected by the autonomous legislation of the State in which the place of origin is situated, be used only to indicate the origin of the wine.

The Contracting Parties shall notify one another of the autonomous regulations for protecting the appellations of origin referred to in the preceding paragraph. When this has been done, the Parties shall take such steps as their internal legislation permits to prevent as far as possible any abuse of the said appellations of origin.

II. AUSTRIAN CUSTOMS TARIFF.

Ad Nos. 5 and 40 (a) I :

Trade in paprika beans and ground paprika in the Republic of Austria shall be subject to the following provisions :

1. Appellations of paprika beans or ground paprika indicating that they come from Hungary or from a place or district in Hungarian territory shall never be regarded as indications of the kind or quality. Such appellations may therefore only be used to indicate the origin of paprika beans coming from the area (State, district, locality) described by such appellation or of the ground paprika produced there.

2. The use of such an appellation (No. 1) for paprika beans or ground paprika of different origin shall not be permitted even when such appellation is accompanied by a statement showing the real origin, or by the words "quality", "type", "kind", or by any other similar expression whatsoever.

3. The use of an appellation (No. 1) indicating Hungarian origin shall, furthermore, not be permitted even when the ground paprika thus described is a mixture of paprika of Hungarian with paprika of other origin, whatever be the proportions of the mixture.

Ad No. 23 :

It is understood that wheat of Hungarian origin and provenance shall, on importation into Austria, as from July 1st, 1933, be dutiable, up to an annual amount of 500,000 quintals, at a rate which shall be 3.20 Crowns per 100 kg. less than the general Austrian Customs tariff rate for wheat.

This provision shall only come into force when the States with which the Austrian Republic has concluded conventions containing the most-favoured-nation clause have agreed to the said reduction of Customs duties being applied to wheat of Hungarian origin and provenance. The Austrian Federal Government shall immediately apply to the States concerned for such a declaration.

Other pasteboard : Hand-made pasteboard is prepared by the worker slipping or rolling the layers of pulp of the required thickness (which must invariably be of one colour, viz. brown or white, or gray) on the cylinder and cutting off and removing by hand the sheets thus couched (pressed) together without passing the pasteboard on to an attached dry calender. Hand-made pasteboard prepared in this way invariably has a rough edge and is never cut on all four sides.

Machine-made pasteboard is a generic term for pasteboard which is prepared by a single process by a continuous pulp feed, direct on to an attached dry calender and is then left in rolls or cut into sheets. All kinds of pasteboard coming under the definition of " machine-made " are recognisable by the fact that the edges of the board, whether in the roll or in sheets, are always cut, *i. e.* they are never rough as in the case of hand-made pasteboard.

The term " machine-made pasteboard " includes the following kinds in use in the trade :

- (a) Machine-made pasteboard, *i. e.* pasteboard consisting of a single layer of pulp, white, brown or gray ;
- (b) Cardboard dyed in the pulp in all colours, but not in white, brown or gray ;
- (c) Duplex cardboard, *i. e.* cardboard prepared in two layers of different colours ;

(d) Triplex cardboard, *i. e.* cardboard prepared in three layers, the inner layer being of a different colour from the outside layers ; the two outside layers may be either identical or different in colour.

All the foregoing kinds may be either glazed or not.

Ad Nos. 496 (b) and 499 :

Hat packing paper : Hat packing paper is smoothed on one side only, unbleached (yellowish to brown), not dyed, of coarse pulp, fairly opaque.

Ad No. 497 (a) :

The Royal Hungarian Government declares that printing paper in rolls for the production of newspapers on rotary printing machines (No. 497 (a)) shall during the validity of this Agreement be admitted free of duty subject to license.

Ad No. 516 :

Letter paper (writing paper) : The Customs authorities will disregard, in the assessment of duty, clips, corners, fasteners, tags even composed of wire thread, holes with eyelets, twine, bands, ribbons, etc. used for tying up note-paper, letter-cards, envelopes, and packages of note-paper, and in the latter case for facilitating their handling.

Ad No. 526 :

In the case of writing cases, and blotters for writing-desks, the Customs authorities will disregard in the assessment of duty locks and ornaments in common metals, provided the latter do not give the goods the character of an artistic product.

For example, in outer garments, the use of any kind of textile fabrics or knitted materials for collars or cuffs, and in underwear lace trimmings sewn on or crocheted on, and not more than 2 cm. in width, will be regarded as non-essential.

Ad No. 622 (g) :
