training, and equipment and materials to the Faculty of Agriculture in the University of Sri Lanka, Peradeniya Campus and to the Post Graduate Institute of Agriculture over a seven-year period to expand these organizations' capacity to indigenously train undergraduates and postgraduates in Agriculture. Annex 1, attached, amplifies the above definition of the Project. Within the limits of the above definition of the Project, elements of the amplified description stated in Annex 1 may be changed by written agreement of the authorized representatives of the Parties named in Section 8.2, without formal amendment of this Agreement.

## ANNEX 1

### 1. *Project Background*

Additional trained personnel are needed in Sri Lanka to plan and implement programs to develop the agricultural potential of the country. While additional skilled personnel are needed at all levels the need for more B.Sc. and advanced degree graduates is particularly acute. Such graduates readily find employment and no pool of unemployed graduates exists. Existing capacity to train graduates is minimal and does not meet identified demand. This capacity is limited to the Faculty of Agriculture at the University of Sri Lanka, Peradeniya Campus, which produces approximately 100 B.Sc. graduates a year and the recently formed Post Graduate Institute of Agriculture also at Peradeniya which utilizes faculty staff and the part-time services of government or private sector employees to instruct graduate students.

Significant expansion of these institutions is necessary to meet the demand for trained personnel. The alternative of continued training abroad in Agriculture is not only more costly in the long run but the training so provided often lacks relevance to Sri Lanka. An expansion of trained people at the B.Sc. and advanced degree levels is directly relevant to and beneficial for the poor in Sri Lanka where the bulk of the poor are on agricultural land, the majority of land is in small holdings, agriculture figures prominently in the economy, and where development has emphasized equity.

### 2. *Project Description*

The purpose of this project is to double the annual number of indigenously trained B.Sc. graduates and triple the annual number of indigenously trained postgraduates by 1985. Employment of these graduates will contribute to the sector goal of promoting agricultural development that increases domestic food production; expands employment opportunities; and improves the small farmers' level of living. Basic assumptions are that B.Sc. and advanced degree holders will be employed locally in programs, both public and private sector, that contribute to agricultural development; that personnel trained to the B.Sc. and advanced levels are important to agricultural development; and that the agricultural development which does occur will benefit small farmers and the rural poor. The validity of these assumptions is based on the demand for trained personnel ascertained from various studies and experience; the lack of unemployment among existing graduates; the realization that national programs benefit from planning and implementation by people with relevant training; the history of social equity in previous programs; and the equity considerations inherent in planned programs in the rural sector.

The means to achieving this purpose is the expansion of the two indigenous institutions training higher level agricultural personnel—the Post Graduate Institute of Agriculture, and the Faculty of Agriculture at the Peradeniya Campus of the University of Sri Lanka, both of which share a common professional staff and many facilities. The method for attaining this increased capability is hiring and training additional staff;

providing expatriate professors both to teach and to supervise the research of staff in training; expanding facilities including library, buildings, and equipment to accommodate increased enrollment; and enrolling more students as more staff and facilities become available. Training is designed to maximize time in Sri Lanka and the relevance of the training to Sri Lanka. It is anticipated that trainees would spend two years abroad in course work, one and a half years in Sri Lanka doing research, and approximately 6 months abroad completing degree requirements. While in Sri Lanka their research would be supervised by a visiting staff member in their specialty.

The responsibility for providing the inputs which would lead to the outputs indicating additional institutional capability are shared between AID, the GSL, and other donors as follows:

A. AID would finance:

1. Approximately 28 person-years of technical assistance, primarily visiting faculty both long and short term, through a host country contract with a U.S. institution;
2. Ph.D. training for a target figure of 38 participants at different schools under the same host country contract;
3. Equipment and vehicles for the Faculty and PGIA programs;
4. Books, material, and equipment for a library;
5. Staff per diem and supervisory visits; and
6. Miscellaneous expenses.

B. The GSL will contribute:

1. Local operating expenses estimated for the period 1978-1985 to be: for PGIA Rs. 7,581,000 (\$473,812) for the Faculty Rs. 27,006,000 (\$1,687,875);
2. Additional on-campus buildings and furniture—Rs. 10,151,000 (\$634,438);
3. Additional off-campus (demonstration farm) facilities at a cost of Rs. 5,078,000 (\$317,375);
4. A portion of the vehicles required for the project including 7 trail bikes, one sedan, 2 twelve-passenger mini-buses, 2 thirty-four passenger buses, one double cab pick-up truck, one 2-3 ton stake truck at an estimated costs of \$100,000;\* and
5. Existing facilities and equipment the value of which has not been determined or attributed.

C. Other Donor financing is being sought for:

1. Training for approximately 12 Ph.D. candidates; and
2. Technical assistance (visiting Faculty) totaling approximately 84 pm.

### 3. *Project Implementation*

The project will be implemented by the Post Graduate Institute of Agriculture (PGIA) with the assistance of the Faculty of Agriculture of the University of Sri Lanka at Peradeniya. The project will be located at the Peradeniya Campus. The PGIA will contract with a U.S. institution or consortium of institutions which will provide technical assistance for the project primarily in the form of visiting faculty to assist in teaching, curriculum development, and supervision of research, and which will be responsible for providing training to Faculty and PGIA professional staff at U.S. institutions.

The project includes financing for equipment, library books and equipment, vehicles, and limited funds for travel of the project manager or designee to the U.S. or supervisory

\* Vehicles may instead be financed by another donor.

visits as well as limited funds to pay per diem of staff enabling them to extend slightly on trips not financed under the project. The means of procuring equipment and library needs will be determined early in project life.

The implementing agencies will be responsible for local costs of the project; for providing staff to be trained; for providing the physical facilities that expansion of faculty and student enrollment will entail; and for recruitment of additional students; as well as for overall implementation of the project.
