[TRANSLATION<sup>1</sup> — TRADUCTION<sup>2</sup>]

AGREEMENT<sup>3</sup> BETWEEN THE REPUBLIC OF VENEZUELA AND THE INTERNATIONAL ATOMIC ENERGY AGENCY FOR THE APPLICATION OF SAFEGUARDS IN CONNECTION WITH THE TREATY FOR THE PROHIBITION OF NUCLEAR WEAPONS IN LATIN AMERICA<sup>4</sup> AND THE TREATY ON THE NON-PROLIFERATION OF NUCLEAR WEAPONS<sup>5</sup>

WHEREAS the Republic of Venezuela (hereinafter referred to as “Venezuela”) is a party to the Treaty for the Prohibition of Nuclear Weapons in Latin America (hereinafter referred to as “the Tlatelolco Treaty”) opened for signature at Mexico City on 14 February 1967;<sup>4</sup>

WHEREAS Article 13 of the Tlatelolco Treaty states, *inter alia*, that “Each Contracting Party shall negotiate multilateral or bilateral agreements with the International Atomic Energy Agency for the application of its safeguards to its nuclear activities . . .”;

WHEREAS Venezuela is a party to the Treaty on the Non-Proliferation of Nuclear Weapons (hereinafter referred to as “the Non-Proliferation Treaty”) opened for signature at London, Moscow and Washington on 1 July 1968<sup>5</sup> and which entered into force on 5 March 1970;

WHEREAS paragraph 1 of Article III of the Treaty reads as follows:

“Each non-nuclear-weapon State Party to the Treaty undertakes to accept safeguards, as set forth in an agreement to be negotiated and concluded with the International Atomic Energy Agency in accordance with the Statute of the International Atomic Energy Agency and the Agency’s safeguards system, for the exclusive purpose of verification of the fulfilment of its obligations assumed under this Treaty with a view to preventing diversion of nuclear energy from peaceful uses to nuclear weapons or other nuclear explosive devices. Procedures for the safeguards required by this Article shall be followed with respect to source or special fissionable material whether it is being produced, processed or used in any principal nuclear facility or is outside any such facility. The safeguards required by this Article shall be applied on all source or special fissionable material in all peaceful nuclear activities within the territory of such State, under its jurisdiction, or carried out under its control anywhere;”

WHEREAS the International Atomic Energy Agency (hereinafter referred to as “the Agency”) is authorized, pursuant to Article III of its Statute,<sup>6</sup> to conclude such agreements;

NOW, THEREFORE, Venezuela and the Agency have agreed as follows:

<sup>1</sup> Translation supplied by the International Atomic Energy Agency.

<sup>2</sup> Traduction fournie par l’Agence internationale de l’énergie atomique.

<sup>3</sup> Came into force on 11 March 1982, the date upon which the Agency received from Venezuela written notification that its statutory and constitutional requirements had been met, in accordance with article 25.

<sup>4</sup> United Nations, *Treaty Series*, vol. 634, p. 281.

<sup>5</sup> *Ibid.*, vol. 729, p. 161.

<sup>6</sup> *Ibid.*, vol. 276, p. 3, and vol. 471, p. 334.

## PART I

## BASIC UNDERTAKING

*Article 1*

Venezuela undertakes to accept safeguards, in accordance with the terms of this Agreement, on all source or special fissionable material in all peaceful nuclear activities within its territory, under its jurisdiction or carried out under its control anywhere, for the exclusive purpose of verifying that such material is not diverted to nuclear weapons or other nuclear explosive devices.

## APPLICATION OF SAFEGUARDS

*Article 2*

The Agency shall have the right and the obligation to ensure that safeguards will be applied, in accordance with the terms of this Agreement, on all source or special fissionable material in all peaceful nuclear activities within the territory of Venezuela, under its jurisdiction or carried out under its control anywhere, for the exclusive purpose of verifying that such material is not diverted to nuclear weapons or other nuclear explosive devices.

## CO-OPERATION BETWEEN VENEZUELA AND THE AGENCY

*Article 3*

Venezuela and the Agency shall co-operate to facilitate the implementation of the safeguards provided for in this Agreement.

## IMPLEMENTATION OF SAFEGUARDS

*Article 4*

The safeguards provided for in this Agreement shall be implemented in a manner designed:

- (a) To avoid hampering the economic and technological development of Venezuela or international co-operation in the field of peaceful nuclear activities, including international exchange of nuclear material;
- (b) To avoid undue interference in Venezuela's peaceful nuclear activities, and in particular in the operation of facilities; and
- (c) To be consistent with prudent management practices required for the economic and safe conduct of nuclear activities.

*Article 5*

(a) The Agency shall take every precaution to protect commercial and industrial secrets and other confidential information coming to its knowledge in the implementation of this Agreement.

(b) (i) The Agency shall not publish or communicate to any State, organization or person any information obtained by it in connection with the implementation of this Agreement, except that specific information relating to the implementation thereof may be given to the Board of Governors of the Agency (hereinafter referred to as "the Board") and to such Agency staff members as

require such knowledge by reason of their official duties in connection with safeguards, but only to the extent necessary for the Agency to fulfil its responsibilities in implementing this Agreement.

(ii) The Board may, if it deems appropriate and if Venezuela expressly agrees thereto, publish summarized information on nuclear material subject to safeguards under this Agreement.

#### Article 6

(a) The Agency shall, in implementing safeguards pursuant to this Agreement, take full account of technological developments in the field of safeguards, and shall make every effort to ensure optimum cost-effectiveness and the application of the principle of safeguarding effectively the flow of nuclear material subject to safeguards under this Agreement by use of instruments and other techniques at certain strategic points to the extent that present or future technology permits.

(b) In order to ensure optimum cost-effectiveness, use shall be made, for example, of such means as:

- (i) Containment as a means of defining material balance areas for accounting purposes;
- (ii) Statistical techniques and random sampling in evaluating the flow of nuclear material; and
- (iii) Concentration of verification procedures on those stages in the nuclear fuel cycle involving the production, processing, use or storage of nuclear material from which nuclear weapons or other nuclear explosive devices could readily be made, and minimization of verification procedures in respect of other nuclear material, on condition that this does not hamper the Agency in applying safeguards under this Agreement.

### NATIONAL SYSTEM OF NUCLEAR MATERIALS ACCOUNTING AND CONTROL

#### Article 7

(a) Venezuela shall establish and maintain a system of accounting for and control of all nuclear material subject to safeguards under this Agreement.

(b) The Agency shall apply safeguards in such a manner as to enable it to verify, in ascertaining that there has been no diversion of nuclear material from peaceful uses to nuclear weapons or other nuclear explosive devices, findings of Venezuela's system. The Agency's verification shall include, *inter alia*, independent measurements and observations conducted by the Agency in accordance with the procedures specified in part II of this Agreement. The Agency, in its verification, shall take due account of the technical effectiveness of Venezuela's system.

### PROVISION OF INFORMATION TO THE AGENCY

#### Article 8

(a) In order to ensure the effective implementation of safeguards under this Agreement, Venezuela shall, in accordance with the provisions set out in Part II

of this Agreement, provide the Agency with information concerning nuclear material subject to safeguards under this Agreement and the features of facilities relevant to safeguarding such material.

(b) (i) The Agency shall require only the minimum amount of information and data consistent with carrying out its responsibilities under this Agreement.

(ii) Information pertaining to facilities shall be the minimum necessary for safeguarding nuclear material subject to safeguards under this Agreement.

(c) If Venezuela so requests, the Agency shall be prepared to examine on premises of Venezuela design information which Venezuela regards as being of particular sensitivity. Such information need not be physically transmitted to the Agency provided that it remains readily available for further examination by the Agency on premises of Venezuela.

#### AGENCY INSPECTORS

##### *Article 9*

(a) (i) The Agency shall secure the consent of Venezuela to the designation of Agency inspectors to Venezuela.

(ii) If Venezuela, either upon proposal of a designation or at any other time after a designation has been made, objects to the designation, the Agency shall propose to Venezuela an alternative designation or designations.

(iii) If, as a result of the repeated refusal of Venezuela to accept the designation of Agency inspectors, inspections to be conducted under this Agreement would be impeded, such refusal shall be considered by the Board, upon referral by the Director General of the Agency (hereinafter referred to as "the Director General"), with a view to its taking appropriate action.

(b) Venezuela shall take the necessary steps to ensure that Agency inspectors can effectively discharge their functions under this Agreement.

(c) The visits and activities of Agency inspectors shall be so arranged as:

- (i) To reduce to a minimum the possible inconvenience and disturbance to Venezuela and to the peaceful nuclear activities inspected; and
- (ii) To ensure protection of industrial secrets or any other confidential information coming to the inspectors' knowledge.

#### PRIVILEGES AND IMMUNITIES

##### *Article 10*

Venezuela shall apply to the Agency, to its inspectors and other officials performing functions under this Agreement, and also to the property of the Agency which may be used in these activities, the relevant provisions of the Agreement on the privileges and immunities of the International Atomic Energy Agency.<sup>1</sup>

---

<sup>1</sup> United Nations, *Treaty Series*, vol. 374, p. 147.

## TERMINATION OF SAFEGUARDS

*Article 11**Consumption or dilution of nuclear material*

Safeguards on nuclear material subject to safeguards under this Agreement shall terminate upon determination by the Agency that the material has been consumed, or has been diluted in such a way that it is no longer usable for any nuclear activity relevant from the point of view of safeguards, or has become practically irrecoverable.

*Article 12**Transfer of nuclear material out of Venezuela*

Venezuela shall notify the Agency of any transfer out of Venezuela which it may have decided to make of nuclear material subject to safeguards under this Agreement, in accordance with the provisions set out in part II of this Agreement. The Agency shall terminate safeguards on nuclear material under this Agreement when the recipient State has assumed responsibility therefor, as provided for in part II of this Agreement. The Agency shall maintain records indicating each transfer and, where applicable, the re-application of safeguards to the transferred nuclear material.

*Article 13**Provisions relating to nuclear material to be used in non-nuclear activities*

Where nuclear material subject to safeguards under this Agreement is to be used in non-nuclear activities, such as the production of alloys or ceramics, Venezuela shall agree with the Agency on the circumstances under which the safeguards on such material may be terminated.

NON-APPLICATION OF SAFEGUARDS TO NUCLEAR MATERIAL TO BE  
USED IN NON-PEACEFUL ACTIVITIES*Article 14*

If Venezuela intends to exercise its discretion to use nuclear material which is required to be safeguarded under this Agreement in a nuclear activity which does not require the application of safeguards under this Agreement, the following procedures shall apply:

- (a) Venezuela shall inform the Agency of the activity, making it clear:
  - (i) That the use of the nuclear material in a non-proscribed military activity will not be in conflict with an undertaking Venezuela may have given and in respect of which Agency safeguards apply, that the material will be used only in a peaceful nuclear activity; and
  - (ii) That during the period of non-application of safeguards the nuclear material will not be used for the production of nuclear weapons or other nuclear explosive devices.

(b) Venezuela and the Agency shall make an arrangement so that, only while the nuclear material is in such an activity, the safeguards provided for in this

Agreement will not be applied. The arrangement shall identify, to the extent possible, the period or circumstances during which safeguards will not be applied. In any event, the safeguards provided for in this Agreement shall apply again as soon as the nuclear material is reintroduced into a peaceful nuclear activity. The Agency shall be kept informed of the total quantity and composition of such unsafeguarded material in Venezuela and of any export of such material; and

(c) Each arrangement shall be made in agreement with the Agency. Such agreement shall be given as promptly as possible and shall relate only to such matters as, *inter alia*, temporal and procedural provisions and reporting arrangements, but shall not involve any approval or classified knowledge of the military activity or relate to the use of the nuclear material therein.

#### FINANCE

##### *Article 15*

Venezuela and the Agency will bear the expenses incurred by them in implementing their respective responsibilities under this Agreement. However, if Venezuela or persons under its jurisdiction incur extraordinary expenses as a result of a specific request by the Agency, the Agency shall reimburse such expenses provided that it has agreed in advance to do so. In any case the Agency shall bear the cost of any additional measuring or sampling which inspectors may request.

#### THIRD PARTY LIABILITY FOR NUCLEAR DAMAGE

##### *Article 16*

Venezuela shall ensure that any protection against third party liability in respect of nuclear damage, including any insurance or other financial security, which may be available under its laws or regulations shall apply to the Agency and its officials for the purpose of the implementation of this Agreement, in the same way as that protection applies to nationals of Venezuela.

#### INTERNATIONAL RESPONSIBILITY

##### *Article 17*

Any claim by Venezuela against the Agency or by the Agency against Venezuela in respect of any damage resulting from the implementation of safeguards under this Agreement, other than damage arising out of a nuclear incident, shall be settled in accordance with international law.

#### MEASURES IN RELATION TO VERIFICATION OF NON-DIVERSION

##### *Article 18*

If the Board, upon report of the Director General, decides that an action by Venezuela is essential and urgent in order to ensure verification that nuclear material subject to safeguards under this Agreement is not diverted to nuclear weapons or other nuclear explosive devices, the Board may call upon Venezuela to take the required action without delay, irrespective of whether procedures have been invoked pursuant to article 22 of this Agreement for the settlement of a dispute.

*Article 19*

If the Board, upon examination of relevant information reported to it by the Director General, finds that the Agency is not able to verify that there has been no diversion of nuclear material required to be safeguarded under this Agreement to nuclear weapons or other nuclear explosive devices, it may make the reports provided for in paragraph C of article XII of the Statute of the Agency (hereinafter referred to as "the Statute") and may also take, where applicable, the other measures provided for in that paragraph. In taking such action the Board shall take account of the degree of assurance provided by the safeguards measures that have been applied and shall afford Venezuela every reasonable opportunity to furnish the Board with any necessary reassurance.

INTERPRETATION AND APPLICATION OF THE AGREEMENT  
AND SETTLEMENT OF DISPUTES

*Article 20*

Venezuela and the Agency shall, at the request of either, consult about any question arising out of the interpretation or application of this Agreement.

*Article 21*

Venezuela shall have the right to request that any question arising out of the interpretation or application of this Agreement be considered by the Board. The Board shall invite Venezuela to participate in the discussion of any such question by the Board.

*Article 22*

Any dispute arising out of the interpretation or application of this Agreement, except a dispute with regard to a finding by the Board under article 19 or an action taken by the Board pursuant to such a finding, which is not settled by negotiation or another procedure agreed to by Venezuela and the Agency shall, at the request of either, be submitted to an arbitral tribunal composed as follows: Venezuela and the Agency shall each designate one arbitrator, and the two arbitrators so designated shall elect a third, who shall be the Chairman. If, within thirty days of the request for arbitration, either Venezuela or the Agency has not designated an arbitrator, either Venezuela or the Agency may request the President of the International Court of Justice to appoint an arbitrator. The same procedure shall apply if, within thirty days of the designation or appointment of the second arbitrator, the third arbitrator has not been elected. A majority of the members of the arbitral tribunal shall constitute a quorum, and all decisions shall require the concurrence of two arbitrators. The arbitral procedure shall be fixed by the tribunal. The decisions of the tribunal shall be binding on Venezuela and the Agency.

AMENDMENT OF THE AGREEMENT

*Article 23*

(a) Venezuela and the Agency shall, at the request of either, consult each other on amendment to this Agreement.

(b) All amendments shall require the agreement of Venezuela and the Agency.

(c) Amendments to this Agreement shall enter into force in the same conditions as entry into force of the Agreement itself.

(d) The Director General shall promptly inform all Member States of the Agency of any amendment to this Agreement.

#### SUSPENSION OF APPLICATION OF AGENCY SAFEGUARDS UNDER OTHER AGREEMENTS

##### *Article 24*

The application of Agency safeguards in Venezuela under other safeguards agreements with the Agency shall be suspended while this Agreement is in force.

#### ENTRY INTO FORCE AND DURATION

##### *Article 25*

This Agreement shall enter into force on the date upon which the Agency receives from Venezuela written notification that all Venezuela's statutory and constitutional requirements for entry into force have been met. The Director General shall promptly inform all Member States of the Agency of the entry into force of this Agreement.

##### *Article 26*

This Agreement shall remain in force as long as Venezuela is party to the Tlatelolco Treaty or the Non-Proliferation Treaty, or both.

#### PART II

#### INTRODUCTION

##### *Article 27*

The purpose of this part of the Agreement is to specify the procedures to be applied in the implementation of the safeguards provisions of Part I.

#### OBJECTIVE OF SAFEGUARDS

##### *Article 28*

The objective of the safeguards procedures set forth in this part of the Agreement is the timely detection of diversion of significant quantities of nuclear material from peaceful nuclear activities to the manufacture of nuclear weapons or of other nuclear explosive devices or for purposes unknown, and deterrence of such diversion by the risk of early detection.

##### *Article 29*

For the purpose of achieving the objective set forth in article 28, material accountancy shall be used as a safeguards measure of fundamental importance, with containment and surveillance as important complementary measures.

##### *Article 30*

The technical conclusion of the Agency's verification activities shall be a statement, in respect of each material balance area, of the amount of material

unaccounted for over a specific period, and giving the limits of accuracy of the amounts stated.

VENEZUELA'S SYSTEM OF ACCOUNTING FOR AND CONTROL  
OF NUCLEAR MATERIAL

*Article 31*

Pursuant to article 7 the Agency, in carrying out its verification activities, shall make full use of Venezuela's system of accounting for and control of all nuclear material subject to safeguards under this Agreement and shall avoid unnecessary duplication of Venezuela's accounting and control activities.

*Article 32*

Venezuela's system of accounting for and control of all nuclear material subject to safeguards under this Agreement shall be based on a structure of material balance areas, and shall make provision, as appropriate and specified in the Subsidiary Arrangements, for the establishment of such measures as:

- (a) A measurement system for the determination of the quantities of nuclear material received, produced, shipped, lost or otherwise removed from inventory, and the quantities on inventory;
- (b) The evaluation of precision and accuracy of measurements and the estimation of measurement uncertainty;
- (c) Procedures for identifying, reviewing and evaluating differences between the measurements of the shipper and the receiver;
- (d) Procedures for taking a physical inventory;
- (e) Procedures for the evaluation of accumulations of unmeasured inventory and unmeasured losses;
- (f) A system of records and reports showing, for each material balance area, the inventory of nuclear material and the changes in that inventory including receipts into and transfers out of the material balance area;
- (g) Provisions to ensure that the accounting procedures and arrangements are being operated correctly; and
- (h) Procedures for the provision of reports to the Agency in accordance with articles 59–69.

STARTING POINT OF SAFEGUARDS

*Article 33*

Safeguards under this Agreement shall not apply to material in mining or ore processing activities.

*Article 34*

(a) When any material containing uranium or thorium which has not reached the stage of the nuclear fuel cycle described in paragraph (c) is directly or indirectly exported to a non-nuclear-weapon State, Venezuela shall inform the Agency of its quantity, composition and destination, unless the material is exported for specifically non-nuclear purposes;

(b) When any material containing uranium or thorium which has not reached the stage of the nuclear fuel cycle described in paragraph (c) is imported, Venezuela shall inform the Agency of its quantity and composition, unless the material is imported for specifically non-nuclear purposes; and

(c) When any nuclear material of a composition and purity suitable for fuel fabrication or for isotopic enrichment leaves the plant or the process stage in which it has been produced, or when such nuclear material, or any other nuclear material produced at a later stage in the nuclear fuel cycle, is imported into Venezuela, the nuclear material shall become subject to the other safeguards procedures specified in this Agreement.

#### TERMINATION OF SAFEGUARDS

##### *Article 35*

(a) Safeguards shall terminate on nuclear material subject to safeguards under this Agreement, under the conditions set forth in article 11. Where the conditions of that Article are not met, but Venezuela considers that the recovery of safeguarded nuclear material from residues is not for the time being practicable or desirable, Venezuela and the Agency shall consult on the appropriate safeguards measures to be applied.

(b) Safeguards shall terminate on nuclear material subject to safeguards under this Agreement, under the conditions set forth in article 13, provided that Venezuela and the Agency agree that such nuclear material is practicably irrecoverable.

#### EXEMPTIONS FROM SAFEGUARDS

##### *Article 36*

At the request of Venezuela, the Agency shall exempt nuclear material from safeguards as follows:

- (a) Special fissionable material, when it is used in gram quantities or less as a sensing component in instruments;
- (b) Nuclear material, when it is used in non-nuclear activities in accordance with article 13, if such nuclear material is recoverable; and
- (c) Plutonium with an isotopic concentration of plutonium-238 exceeding 80%.

##### *Article 37*

The nuclear material which should normally be subject to safeguards under this Agreement shall, at the request of Venezuela, be exempt therefrom provided that the nuclear material which has been so exempted in the territory of Venezuela may not at any time exceed the following amounts:

- (a) One kilogram in total of special fissionable material, which may consist of one or more of the following:
  - (i) Plutonium;
  - (ii) Uranium with an enrichment of 0.2 (20%) and above, taken account of by multiplying its weight by its enrichment; and

- (iii) Uranium with an enrichment below 0.2 (20%) and above that of natural uranium, taken account of by multiplying its weight by five times the square of its enrichment;
  - (b) Ten metric tons in total of natural uranium and depleted uranium with an enrichment above 0.005 (0.5%);
  - (c) Twenty metric tons of depleted uranium with an enrichment of 0.005 (0.5%) or below; and
  - (d) Twenty metric tons of thorium;
- or such greater amounts as may be specified by the Board for uniform application.

#### *Article 38*

If nuclear material exempted from safeguards under this Agreement is to be processed or stored together with nuclear material subject to safeguards under this Agreement, provision shall be made for the re-application of safeguards thereto.

### SUBSIDIARY ARRANGEMENTS

#### *Article 39*

Venezuela and the Agency shall make Subsidiary Arrangements which shall specify in detail, to the extent necessary to permit the Agency to fulfil its responsibilities under this Agreement in an effective and efficient manner, how the procedures laid down in this Agreement are to be applied. The Subsidiary Arrangements may be extended or changed by agreement between Venezuela and the Agency without amendment of this Agreement.

#### *Article 40*

The Subsidiary Arrangements shall enter into force at the same time as, or as soon as possible after, the entry into force of this Agreement. Venezuela and the Agency shall make every effort to achieve their entry into force within ninety days of the entry into force of this Agreement; an extension of that period shall require agreement between Venezuela and the Agency. Venezuela shall provide the Agency promptly with the information required for completing the Subsidiary Arrangements. Upon the entry into force of the present Agreement, the Agency shall have the right to apply the procedures laid down in this Agreement in respect of the nuclear material listed in the inventory provided for in article 41, even if the Subsidiary Arrangements have not yet entered into force.

### INVENTORY

#### *Article 41*

On the basis of the initial report referred to in article 62, the Agency shall establish a unified inventory of all nuclear material in Venezuela subject to safeguards under this Agreement, irrespective of its origin, and shall maintain this inventory on the basis of subsequent reports and of the results of its verification activities. Copies of the inventory shall be made available to Venezuela at intervals to be agreed.

## DESIGN INFORMATION

*General provisions**Article 42*

Pursuant to article 8, design information in respect of existing facilities shall be provided to the Agency during the discussion of the Subsidiary Arrangements. The time limits for the provision of design information in respect of the new facilities shall be specified in the Subsidiary Arrangements and such information shall be provided as early as possible before nuclear material is introduced into a new facility.

*Article 43*

The design information to be provided to the Agency shall include, in respect of each facility, when applicable:

- (a) The identification of the facility, stating its general character, purpose, nominal capacity and geographic location, and the name and address to be used for routine business purposes;
- (b) A description of the general arrangement of the facility with reference, to the extent feasible, to the form, location and flow of nuclear material and to the general layout of important items of equipment which use, produce or process nuclear material;
- (c) A description of features of the facility relating to material accountancy, containment and surveillance; and
- (d) A description of the existing and proposed procedures at the facility for nuclear material accountancy and control, with special reference to material balance areas established by the operator, measurements of flow and procedures for physical inventory taking.

*Article 44*

Other information relevant to the application of safeguards shall also be provided to the Agency in respect of each facility, in particular on organizational responsibility for material accountancy and control. Venezuela shall provide the Agency with supplementary information on the health and safety procedures which the Agency shall observe and with which the inspectors shall comply at the facility.

*Article 45*

Venezuela shall provide the Agency, for examination, with facility design information relating to any modification relevant for safeguards purposes, sufficiently in advance for the safeguards procedures to be adjusted when necessary.

*Article 46**Purposes of examination of design information*

The design information provided to the Agency shall be used for the following purposes:

- (a) To identify the features of facilities and nuclear material relevant to the application of safeguards to nuclear material in sufficient detail to facilitate verification;
- (b) To determine material balance areas to be used for Agency accounting purposes and to select those strategic points which are key measurement points and which will be used to determine flow and inventory of nuclear material; in determining such material balance areas the Agency shall, *inter alia*, use the following criteria:
  - (i) The size of the material balance area shall be related to the accuracy with which the material balance can be established;
  - (ii) In determining the material balance area advantage shall be taken of any opportunity to use containment and surveillance to help ensure the completeness of flow measurements and thereby to simplify the application of safeguards and to concentrate measurement efforts at key measurement points;
  - (iii) A number of material balance areas in use at a facility or at distinct sites may be combined in one material balance area to be used for Agency accounting purposes when the Agency determines that this is consistent with its verification requirements; and
  - (iv) A special material balance area may be established at the request of Venezuela around a process step involving commercially sensitive information;
- (c) To establish the nominal timing and procedures for taking of physical inventory of nuclear material for Agency accounting purposes;
- (d) To establish the records and reports requirements and records evaluation procedures;
- (e) To establish requirements and procedures for verification of the quantity and location of nuclear material; and
- (f) To select appropriate combinations of containment and surveillance methods and techniques and the strategic points at which they are to be applied.

The results of the examination of the design information shall be included in the Subsidiary Arrangements.

#### *Article 47*

##### *Re-examination of design information*

Design information shall be re-examined in the light of changes in operating conditions, of developments in safeguards technology or of experience in the application of verification procedures, with a view to modifying the action the Agency has taken pursuant to article 46.

#### *Article 48*

##### *Verification of design information*

The Agency, in co-operation with Venezuela, may send inspectors to facilities to verify the design information provided to the Agency pursuant to articles 42-45, for the purposes stated in article 46.

## INFORMATION IN RESPECT OF NUCLEAR MATERIAL OUTSIDE FACILITIES

*Article 49*

The Agency shall be provided with the following information relating to nuclear material customarily used outside facilities, as applicable:

- (a) A general description of the use of the nuclear material, its geographic location, and the user's name and address for routine business purposes; and
- (b) A general description of the existing and proposed procedures for nuclear material accountancy and control, including organizational responsibility for material accountancy and control.

The Agency shall be informed, on a timely basis, of any change in the information provided to it under this article.

*Article 50*

The information provided to the Agency pursuant to article 49 may be used, to the extent relevant, for the purposes set out in article 46(b)-(f).

## RECORDS SYSTEM

*General provisions**Article 51*

In establishing its system of nuclear materials accounting and control as referred to in article 7, Venezuela shall arrange that records are kept in respect of each material balance area. The records to be kept shall be described in the Subsidiary Arrangements.

*Article 52*

Venezuela shall make arrangements to facilitate the examination by Agency inspectors of the records referred to in article 51.

*Article 53*

Records shall be retained for at least five years.

*Article 54*

Records shall consist, as appropriate, of:

- (a) Accounting records of all nuclear material subject to safeguards under this Agreement; and
- (b) Operating records for facilities containing such nuclear material.

*Article 55*

The system of measurements on which the records used for the preparation of reports are based shall either conform to the latest international standards or be equivalent in quality to such standards.

*Accounting records**Article 56*

The accounting records shall set forth the following in respect of each material balance area:

- (a) All inventory changes, so as to permit a determination of the book inventory at any time;
- (b) All measurement results that are used for determination of the physical inventory; and
- (c) All adjustments and corrections that have been made in respect of inventory changes, book inventories and physical inventories.

*Article 57*

For all inventory changes and physical inventories the records shall show, in respect of each batch of nuclear material: material identification, batch data and source data. The records shall account for uranium, thorium and plutonium separately in each batch of nuclear material. For each inventory change, the date of the inventory change and, when appropriate, the originating material balance area and the receiving material balance area or the recipient, shall be indicated.

*Article 58**Operating records*

The operating records shall set forth, as appropriate, in respect of each material balance area:

- (a) Those operating data which are used to establish changes in the quantities and composition of nuclear material;
- (b) The data obtained from the calibration of tanks and instruments and from sampling and analyses, the procedures to control the quality of measurements and the derived estimates of random and systematic error;
- (c) A description of the sequence of the actions taken in preparing for, and in taking, a physical inventory, in order to ensure that it is correct and complete; and
- (d) A description of the actions taken in order to ascertain the cause and magnitude of any accidental or unmeasured loss that might occur.

## REPORTS SYSTEM

*General provisions**Article 59*

Venezuela shall provide the Agency with reports as detailed in articles 60–69 in respect of nuclear material subject to safeguards under this Agreement.

*Article 60*

The reports shall be made in Spanish.

*Article 61*

Reports shall be based on the records kept in accordance with articles 51–58 and shall consist, as appropriate, of accounting reports and special reports.

*Accounting reports**Article 62*

The Agency shall be provided with an initial report on all nuclear material subject to safeguards under this Agreement. The initial report shall be dispatched by Venezuela to the Agency within 30 days of the last day of the calendar month in which this Agreement enters into force, and shall reflect the situation as of the last day of that month.

*Article 63*

Venezuela shall provide the Agency with the following accounting reports for each material balance area:

- (a) Inventory change reports showing all changes in the inventory of nuclear material. The reports shall be dispatched as soon as possible and in any event within thirty days after the end of the month in which the inventory changes occurred or were established; and
- (b) Material balance reports showing the material balance based on a physical inventory of nuclear material actually present in the material balance area. The reports shall be dispatched as soon as possible and in any event within 30 days after the physical inventory has been taken.

The reports shall be based on data available as of the date of reporting and may be corrected at a later date, as required.

*Article 64*

Inventory change reports shall specify identification and batch data for each batch of nuclear material, the date of the inventory change and, as appropriate, the originating material balance area and the receiving material balance area or the recipient. These reports shall be accompanied by concise notes:

- (a) Explaining the inventory changes, on the basis of the operating data contained in the operating records provided for under article 58(a); and
- (b) Describing, as specified in the Subsidiary Arrangements, the anticipated operational programme, particularly the taking of a physical inventory.

*Article 65*

Venezuela shall report each inventory change, adjustment and correction, either periodically in a consolidated list or individually. Inventory changes shall be reported in terms of batches; small quantities, such as samples for analysis, which are specified in the Subsidiary Arrangements, may be combined and reported as one inventory change.

*Article 66*

The Agency shall provide Venezuela with semi-annual statements of book inventory of nuclear material subject to safeguards under this Agreement, for

each material balance area, as based on the inventory change reports for the period covered by each such statement.

*Article 67*

Material balance reports shall include the following entries, unless otherwise agreed by Venezuela and the Agency:

- (a) Beginning physical inventory;
- (b) Inventory changes (first increases, then decreases);
- (c) Ending book inventory;
- (d) Shipper/receiver differences;
- (e) Adjusted ending book inventory;
- (f) Ending physical inventory; and
- (g) Material unaccounted for.

A statement of the physical inventory, listing all batches separately and specifying material identification and batch data for each batch, shall be attached to each material balance report.

*Article 68*

*Special reports*

Venezuela shall make special reports without delay:

- (a) If any unusual incident or circumstances lead Venezuela to believe that there is or may have been loss of nuclear material that exceeds the limits specified for this purpose in the Subsidiary Arrangements; or
- (b) If the containment has unexpectedly changed from that specified in the Subsidiary Arrangements to the extent that unauthorized removal of nuclear material has become possible.

*Article 69*

*Amplification and clarification of reports*

If the Agency so requests, Venezuela shall provide it with amplifications or clarifications of any report, in so far as relevant for the purpose of safeguards.

INSPECTIONS

*Article 70*

*General provisions*

The Agency shall have the right to make inspections as provided for in articles 71-82.

*Purposes of inspections*

*Article 71*

The Agency may make *ad hoc* inspections in order to:

- (a) Verify the information contained in the initial report on the nuclear material subject to safeguards under this Agreement;
- (b) Identify and verify changes in the situation which have occurred since the date of the initial report; and
- (c) Identify, and if possible verify the quantity and composition of, nuclear material in accordance with articles 93 and 96, before its transfer out of or upon its transfer into Venezuela.

#### *Article 72*

The Agency may make routine inspections in order to:

- (a) Verify that reports are consistent with records;
- (b) Verify the location, identity, quantity and composition of all nuclear material subject to safeguards under this Agreement; and
- (c) Verify information on the possible causes of material unaccounted for, shipper/receiver differences and uncertainties in the book inventory.

#### *Article 73*

Subject to the procedures laid down in article 77, the Agency may make special inspections:

- (a) In order to verify the information contained in special reports; or
- (b) If the Agency considers that information made available by Venezuela, including explanations from Venezuela and information obtained from routine inspections, is not adequate for the Agency to fulfil its responsibilities under this Agreement.

An inspection shall be deemed to be special when it is either additional to the routine inspection effort provided for in articles 78-82 or involves access to information or locations in addition to the access specified in article 76 for *ad hoc* and routine inspections, or both.

#### *Scope of inspections*

#### *Article 74*

For the purposes specified in articles 71-73, the Agency may:

- (a) Examine the records kept pursuant to articles 51-58;
- (b) Make independent measurements of all nuclear material subject to safeguards under this Agreement;
- (c) Verify the functioning and calibration of instruments and other measuring and control equipment;
- (d) Apply and make use of surveillance and containment measures; and
- (e) Use other objective methods which have been demonstrated to be technically feasible.

#### *Article 75*

Within the scope of article 74, the Agency shall be enabled:

- (a) To observe that samples at key measurement points for material balance accountability are taken in accordance with procedures which produce repre-

- sentative samples, to observe the treatment and analysis of the samples and to obtain duplicates of such samples;
- (b) To observe that the measurements of nuclear material at key measurement points for material balance accountancy are representative, and to observe the calibration of the instruments and equipment involved;
  - (c) To make arrangements with Venezuela that, if necessary:
    - (i) Additional measurements are made and additional samples taken for analysis thereof by the Agency;
    - (ii) The Agency's standard analytical samples are analysed;
    - (iii) Appropriate absolute standards are used in calibrating instruments and other equipment; and
    - (iv) Other calibrations are carried out;
  - (d) To arrange to use its own equipment for independent measurement and surveillance, and if so agreed and specified in the Subsidiary Arrangements, to arrange to install such equipment;
  - (e) To apply its seals and other identifying and tamper-indicating devices to containments, if so agreed and specified in the Subsidiary Arrangements; and
  - (f) To make arrangements with Venezuela for the shipping of samples taken for the Agency's use.

#### *Access for inspections*

##### *Article 76*

(a) For the purposes specified in article 71(a) and (b) and until such time as the strategic points have been specified in the Subsidiary Arrangements, the Agency inspectors shall have access to any location where the initial report or any inspections carried out in connection with it indicate that nuclear material is present;

(b) For the purposes specified in Article 71(c) the inspectors shall have access to any location of which the Agency has been notified in accordance with articles 92(d) (iii) or 95(d)(iii);

(c) For the purposes specified in article 72 the inspectors shall have access only to the strategic points specified in the Subsidiary Arrangements and to the records maintained pursuant to articles 51-58; and

(d) In the event of Venezuela concluding that any unusual circumstances require extended limitations on access by the Agency, Venezuela and the Agency shall promptly make arrangements with a view to enabling the Agency to discharge its safeguards responsibilities in the light of these limitations. The Director General shall report each such arrangement to the Board.

##### *Article 77*

In circumstances which may lead to special inspections for the purposes specified in article 73, Venezuela and the Agency shall consult forthwith. As a result of such consultations the Agency may:

- (a) Make inspections in addition to the routine inspection effort provided for in articles 78-82; and

- (b) Obtain access, in agreement with Venezuela, to information or locations in addition to those specified in article 76. Any disagreement concerning the need for additional access shall be resolved in accordance with articles 21 and 22; in case action by Venezuela is essential and urgent, article 18 shall apply.

*Frequency and intensity of routine inspections*

*Article 78*

The number, intensity, duration and timing of routine inspections, shall be kept to the minimum consistent with the effective implementation of the safeguards procedures set forth in this Agreement, and shall make the optimum and most economical use of inspection resources available.

*Article 79*

The Agency may carry out one routine inspection per year in respect of facilities and material balance areas outside facilities with a content or annual throughput, whichever is greater, of nuclear material not exceeding five effective kilograms.

*Article 80*

The number, intensity, duration, timing and mode of routine inspections in respect of facilities with a content or annual throughput of nuclear material exceeding five effective kilograms shall be determined on the basis that in the maximum or limiting case the inspection regime shall be no more intensive than is necessary and sufficient to maintain continuity of knowledge of the flow and inventory of nuclear material, and the maximum routine inspection effort in respect of such facilities shall be determined as follows:

- (a) For reactors and sealed storage installations the maximum total of routine inspection per year shall be determined by allowing one sixth of a man-year of inspection for each such facility;
- (b) For facilities, other than reactors or sealed storage installations, involving plutonium or uranium enriched to more than 5%, the maximum total of routine inspection per year shall be determined by allowing for each such facility  $30 \times \sqrt{E}$  man-days of inspection per year, where  $E$  is the inventory or annual throughput of nuclear material, whichever is greater, expressed in effective kilograms. The maximum established for any such facility shall not, however, be less than 1.5 man-years of inspection; and
- (c) For facilities not covered by paragraphs (a) or (b), the maximum total of routine inspection per year shall be determined by allowing for each such facility one third of a man-year of inspection plus  $0.4 \times E$  man-days of inspection per year, where  $E$  is the inventory or annual throughput of nuclear material, whichever is greater, expressed in effective kilograms.

Venezuela and the Agency may agree to amend the figures for the maximum inspection effort specified in this article, upon determination by the Board that such amendment is reasonable.

### Article 81

Subject to articles 78-80 the criteria to be used for determining the actual number, intensity, duration, timing and mode of routine inspections in respect of any facility shall include:

- (a) The form of the nuclear material, in particular, whether the nuclear material is in bulk form or contained in a number of separate items; its chemical composition and, in the case of uranium, whether it is of low or high enrichment; and its accessibility;
- (b) The effectiveness of Venezuela's accounting and control system, including the extent to which the operators of facilities are functionally independent of Venezuela's accounting and control system; the extent to which the measures specified in article 32 have been implemented by Venezuela; the promptness of reports provided to the Agency; their consistency with the Agency's independent verification; and the amount and accuracy of the material unaccounted for, as verified by the Agency;
- (c) Characteristics of Venezuela's nuclear fuel cycle, in particular, the number and types of facilities containing nuclear material subject to safeguards, the characteristics of such facilities relevant to safeguards, notably the degree of containment; the extent to which the design of such facilities facilitates verification of the flow and inventory of nuclear material; and the extent to which information from different material balance areas can be correlated;
- (d) International interdependence, in particular, the extent to which nuclear material is received from or sent to other States for use or processing; any verification activities by the Agency in connection therewith; and the extent to which Venezuela's nuclear activities are interrelated with those of other States; and
- (e) Technical developments in the field of safeguards, including the use of statistical techniques and random sampling in evaluating the flow of nuclear material.

### Article 82

Venezuela and the Agency shall consult if Venezuela considers that the inspection effort is being deployed with undue concentration on particular facilities.

### *Notice of inspections*

### Article 83

The Agency shall give advance notice to Venezuela before arrival of inspectors at facilities or material balance areas outside facilities, as follows:

- (a) For *ad hoc* inspections pursuant to article 71(c), at least 24 hours; for those pursuant to article 71(a) and (b) as well as the activities provided for in article 48, at least one week;
- (b) For special inspections pursuant to article 73, as promptly as possible after Venezuela and the Agency have consulted as provided for in article 77, it being understood that notification of arrival normally will constitute part of the consultations; and

- (c) For routine inspections pursuant to article 72, at least 24 hours in respect of the facilities referred to in article 80(b) and sealed storage installations containing plutonium or uranium enriched to more than 5%, and one week in all other cases.

Such notice of inspections shall include the names of the inspectors and shall indicate the facilities and the material balance areas outside facilities to be visited and the periods during which they will be visited. If the inspectors are to arrive from outside Venezuela the Agency shall also give advance notice of the place and time of their arrival in Venezuela.

#### Article 84

Notwithstanding the provisions of article 83, the Agency may, as a supplementary measure, carry out without advance notification a portion of the routine inspections pursuant to article 80 in accordance with the principle of random sampling. In performing any unannounced inspections, the Agency shall fully take into account any operational programme provided by Venezuela pursuant to article 64(b). Moreover, whenever practicable, and on the basis of the operational programme, it shall advise Venezuela periodically of its general programme of announced and unannounced inspections, specifying the general periods when inspections are foreseen. In carrying out any unannounced inspections, the Agency shall make every effort to minimize any practical difficulties for Venezuela and for facility operators, bearing in mind the relevant provisions of articles 44 and 89. Similarly Venezuela shall make every effort to facilitate the task of the inspectors.

#### *Designation of inspectors*

#### Article 85

The following procedures shall apply to the designation of inspectors:

- (a) The Director General shall inform Venezuela in writing of the name, qualifications, nationality, grade and such other particulars as may be relevant, of each Agency official he proposes for designation as an inspector for Venezuela;
- (b) Venezuela shall inform the Director General within thirty days of the receipt of such a proposal whether it accepts the proposal;
- (c) The Director General may designate each official who has been accepted by Venezuela as one of the inspectors for Venezuela, and shall inform Venezuela of such designations; and
- (d) The Director General, acting in response to a request by Venezuela or on his own initiative, shall immediately inform Venezuela of the withdrawal of the designation of any official as an inspector for Venezuela.

However, in respect of inspectors needed for the activities provided for in article 48 and to carry out *ad hoc* inspections pursuant to article 71(a) and (b) the designation procedures shall be completed if possible within 30 days after the entry into force of this Agreement. If such designation appears impossible within this time limit, inspectors for such purposes shall be designated on a temporary basis.

*Article 86*

Venezuela shall grant or renew as quickly as possible appropriate visas, where required, for each inspector designated for Venezuela.

*Conduct and visits of inspectors**Article 87*

Inspectors, in exercising their functions under articles 48 and 71-75, shall carry out their activities in a manner designed to avoid hampering or delaying the construction, commissioning or operation of facilities, or affecting their safety. In particular inspectors shall not operate any facility themselves or direct the staff of a facility to carry out any operation. If inspectors consider that in pursuance of articles 74 and 75, particular operations in a facility should be carried out by the operator, they shall make a request therefor.

*Article 88*

When inspectors require services available in Venezuela, including the use of equipment, in connection with the performance of inspections, Venezuela shall facilitate the procurement of such services and the use of such equipment by inspectors.

*Article 89*

Venezuela shall have the right to have inspectors accompanied during their inspections by representatives of Venezuela, provided that inspectors shall not thereby be delayed or otherwise impeded in the exercise of their functions.

## STATEMENTS ON THE AGENCY'S VERIFICATION ACTIVITIES

*Article 90*

The Agency shall inform Venezuela of:

- (a) The results of inspections, at intervals to be specified in the Subsidiary Arrangements; and
- (b) The conclusions it has drawn from its verification activities in Venezuela, in particular by means of statements in respect of each material balance area, which shall be made as soon as possible after a physical inventory has been taken and verified by the Agency and a material balance has been struck.

## INTERNATIONAL TRANSFERS

*Article 91**General provisions*

Nuclear material subject or required to be subject to safeguards under this Agreement which is transferred internationally shall, for purposes of this Agreement, be regarded as being the responsibility of Venezuela in the following circumstances:

- (a) In the case of import into Venezuela, from the time that such responsibility ceases to lie with the exporting State, and no later than the time at which the material reaches its destination; and

- (b) In the case of export out of Venezuela, up to the time at which the recipient State assumes such responsibility, and no later than the time at which the nuclear material reaches its destination.

The point at which the transfer of responsibility will take place shall be determined in accordance with suitable arrangements to be made by the States concerned. Neither Venezuela nor any other State shall be deemed to have such responsibility for nuclear material merely by reason of the fact that the nuclear material is in transit on or over its territory, or that it is being transported on a ship under its flag or in its aircraft.

### *Transfers out of Venezuela*

#### *Article 92*

(a) Venezuela shall notify the Agency of any intended transfer out of Venezuela of nuclear material subject to safeguards under this Agreement if the shipment exceeds one effective kilogram, or if, within a period of three months, several separate shipments are to be made to the same State, each of less than one effective kilogram but the total of which exceeds one effective kilogram.

(b) Such notification shall be given to the Agency after the conclusion of the contractual arrangements leading to the transfer and normally at least two weeks before the nuclear material is to be prepared for shipping.

(c) Venezuela and the Agency may agree on different procedures for advance notification.

(d) The notification shall specify:

- (i) The identification and, if possible, the expected quantity and composition of the nuclear material to be transferred, and the material balance area from which it will come;
- (ii) The State for which the nuclear material is destined;
- (iii) The dates on and locations at which the nuclear material is to be prepared for shipping;
- (iv) The approximate dates of dispatch and arrival of the nuclear material; and
- (v) At what point of the transfer the recipient State will assume responsibility for the nuclear material for the purpose of this Agreement, and the probable date on which that point will be reached.

#### *Article 93*

The notification referred to in article 92 shall be such as to enable the Agency to make, if necessary, an *ad hoc* inspection to identify, and if possible verify the quantity and composition of, the nuclear material subject to safeguards under this Agreement before it is transferred out of Venezuela and, if the Agency so wishes or Venezuela so requests, to affix seals to the nuclear material when it has been prepared for shipping. However, the transfer of the nuclear material shall not be delayed in any way by an action taken or contemplated by the Agency pursuant to such a notification.

#### *Article 94*

If the nuclear material will not be subject to Agency safeguards in the recipient State, Venezuela shall make arrangements for the Agency to receive, within

three months of the time when the recipient State accepts responsibility for the nuclear material from Venezuela, confirmation by the recipient State of the transfer.

### *Transfers into Venezuela*

#### *Article 95*

(a) Venezuela shall notify the Agency of any expected transfer into Venezuela of nuclear material required to be subject to safeguards under this Agreement if the shipment exceeds one effective kilogram, or if, within a period of three months, several separate shipments are to be received from the same State, each of less than one effective kilogram but the total of which exceeds one effective kilogram.

(b) The Agency shall be notified as much in advance as possible of the expected arrival of the nuclear material, and in any case not later than the date on which Venezuela assumes responsibility for the nuclear material.

(c) Venezuela and the Agency may agree on different procedures for advance notification.

(d) The notification shall specify:

- (i) The identification and, if possible, the expected quantity and composition of the nuclear material;
- (ii) At what point of the transfer Venezuela will assume responsibility for the nuclear material for the purpose of this Agreement, and the probable date on which that point will be reached; and
- (iii) The expected date of arrival, the location where, and the date on which, the nuclear material is intended to be unpacked.

#### *Article 96*

The notification referred to in article 95 shall be such as to enable the Agency to make, if necessary, an *ad hoc* inspection to identify, and if possible verify the quantity and composition of, the nuclear material subject to safeguards under this Agreement at the time the consignment is unpacked. However, unpacking shall not be delayed by any action taken or contemplated by the Agency pursuant to such a notification.

#### *Article 97*

### *Special reports*

Venezuela shall make a special report as envisaged in article 68 if any unusual incident or circumstances lead Venezuela to believe that there is or may have been loss of nuclear material, including the occurrence of significant delay, during an international transfer.

## DEFINITIONS

#### *Article 98*

For the purposes of this Agreement:

A. *Adjustment* means an entry into an accounting record or a report showing a shipper/receiver difference or material unaccounted for.

B. *Annual throughput* means, for the purposes of articles 79 and 80, the amount of nuclear material transferred annually out of a facility working at nominal capacity.

C. *Batch* means a portion of nuclear material handled as a unit for accounting purposes at a key measurement point and for which the composition and quantity are defined by a single set of specifications or measurements. The nuclear material may be in bulk form or contained in a number of separate items.

D. *Batch data* means the total weight of each element of nuclear material and, in the case of plutonium and uranium, the isotopic composition when appropriate. The units of account shall be as follows:

- (a) Grams of contained plutonium;
- (b) Grams of total uranium and grams of contained uranium-235 plus uranium-233 for uranium enriched in these isotopes; and
- (c) Kilograms of contained thorium, natural uranium or depleted uranium.

For reporting purposes the weights of individual items in the batch shall be added together before rounding to the nearest unit.

E. *Book inventory* of a material balance area means the algebraic sum of the most recent physical inventory of that material balance area and of all inventory changes that have occurred since that physical inventory was taken.

F. *Correction* means an entry into an accounting record or a report to rectify an identified mistake or to reflect an improved measurement of a quantity previously entered into the record or report. Each correction must identify the entry to which it pertains.

G. *Effective kilogram* means a special unit used in safeguarding nuclear material. The quantity in effective kilograms is obtained by taking:

- (a) For plutonium, its weight in kilograms;
- (b) For uranium with an enrichment of 0.01 (1%) and above, its weight in kilograms multiplied by the square of its enrichment;
- (c) For uranium with an enrichment below 0.01 (1%) and above 0.005 (0.5%), its weight in kilograms multiplied by 0.0001; and
- (d) For depleted uranium with an enrichment of 0.005 (0.5%) or below, and for thorium, its weight in kilograms multiplied by 0.00005.

H. *Enrichment* means the ratio of the combined weight of the isotopes uranium-233 and uranium-235 to that of the total uranium in question.

I. *Facility* means:

- (a) A reactor, a critical facility, a conversion plant, a fabrication plant, a reprocessing plant, an isotope separation plant or a separate storage installation; or
- (b) Any location where nuclear material in amounts greater than one effective kilogram is customarily used.

J. *Inventory change* means an increase or decrease, in terms of batches, of nuclear material in a material balance area; such a change shall involve one of the following:

- (a) Increases:
  - (i) Import;

- (ii) Domestic receipt: receipts from other material balance areas, receipts from a non-safeguarded (non-peaceful) activity or receipts at the starting point of safeguards;
  - (iii) Nuclear production: production of special fissionable material in a reactor; and
  - (iv) De-exemption: re-application of safeguards on nuclear material previously exempted therefrom on account of its use or quantity.
- (b) Decreases:
- (i) Export;
  - (ii) Domestic shipment: shipments to other material balance areas or shipments for a non-safeguarded (non-peaceful) activity;
  - (iii) Nuclear loss: loss of nuclear material due to its transformation into other element(s) or isotope(s) as a result of nuclear reactions;
  - (iv) Measured discard: nuclear material which has been measured, or estimated on the basis of measurements, and disposed of in such a way that it is not suitable for further nuclear use;
  - (v) Retained waste: nuclear material generated from processing or from an operational accident, which is deemed to be unrecoverable for the time being but which is stored;
  - (vi) Exemption: exemption of nuclear material from safeguards on account of its use or quantity; and
  - (vii) Other loss: for example, accidental loss (that is, irretrievable and inadvertent loss of nuclear material as the result of an operational accident) or theft.

K. *Key measurement point* means a location where nuclear material appears in such a form that it may be measured to determine material flow or inventory. Key measurement points thus include, but are not limited to, the inputs and outputs (including measured discards) and storages in material balance areas.

L. *Man-year of inspection* means, for the purposes of article 80, 300 man-days of inspection, a man-day being a day during which a single inspector has access to a facility at any time for a total of not more than eight hours.

M. *Material balance area* means an area in or outside of a facility such that:

- (a) The quantity of nuclear material in each transfer into or out of each material balance area can be determined; and
- (b) The physical inventory of nuclear material in each material balance area can be determined when necessary, in accordance with specified procedures, in order that the material balance for Agency safeguards purposes can be established.

N. *Material unaccounted for* means the difference between book inventory and physical inventory.

O. *Nuclear material* means any source or any special fissionable material as defined in article XX of the Statute. The term source material shall not be interpreted as applying to ore or ore residue. Any determination by the Board under article XX of the Statute after the entry into force of this Agreement

which adds to the materials considered to be source material or special fissionable material shall have effect under this Agreement only upon acceptance by Venezuela.

P. *Physical inventory* means the sum of all the measured or derived estimates of batch quantities of nuclear material on hand at a given time within a material balance area, obtained in accordance with specified procedures.

Q. *Shipper/receiver difference* means the difference between the quantity of nuclear material in a batch as stated by the shipping material balance area and as measured at the receiving material balance area.

R. *Source data* means those data, recorded during measurement or calibration or used to derive empirical relationships, which identify nuclear material and provide batch data. Source data may include, for example, weight of compounds, conversion factors to determine weight of element, specific gravity, element concentration, isotopic ratios, relationship between volume and manometer readings and relationship between plutonium produced and power generated.

S. *Strategic point* means a location selected during examination of design information where, under normal conditions and when combined with the information from all strategic points taken together, the information necessary and sufficient for the implementation of safeguards measures is obtained and verified; a strategic point may include any location where key measurements related to material balance accountability are made and where containment and surveillance measures are executed.
